TASEKO REPORTS SECOND QUARTER 2019 FINANCIAL AND OPERATIONAL RESULTS

This release should be read with the Company's Financial Statements and Management Discussion & Analysis ("MD&A"), available at www.tasekomines.com and filed on www.sedar.com. Except where otherwise noted, all currency amounts are stated in Canadian dollars. Taseko's 75% owned Gibraltar Mine is located north of the City of Williams Lake in south-central British Columbia. Production volumes stated in this release are on a 100% basis unless otherwise indicated.

August 7, 2019, Vancouver, BC – Taseko Mines Limited (TSX: TKO; NYSE American: TGB) ("Taseko" or the "Company") reports earnings from mining operations before depletion and amortization* of \$18.6 million, Adjusted EBITDA* of \$14.7 million and a net loss of \$11.0 million, or \$0.04 per share, in the second quarter of 2019.

Stuart McDonald, President of Taseko stated, "Gibraltar produced 34.7 million pounds of copper in the second quarter, a 39% increase from the previous quarter, as copper head grades increased as expected. We also benefited from improved recoveries and higher mill throughput. Year-to-date copper production is on budget and we expect to meet our original 2019 copper production guidance of 130 million pounds (+/-5%). Quarterly fluctuations have always been a characteristic of Gibraltar, but on an annual basis the variability is low."

"Site operating costs, net of by-product credits* were US\$1.71 per pound, 10% lower than the previous quarter as a result of the increased copper production in the quarter. Our cash balance increased to \$42 million during the period and we have a number of initiatives underway to further improve this position as we move towards potential development of our Florence Copper Project next year," added Mr. McDonald.

Russell Hallbauer, CEO commented, "The emerging story for Taseko is the Florence Copper Project and we've achieved some significant milestones recently. In April, we plated the first batch of high quality 99.9% copper cathode, just four months after leaching operations commenced. In June, copper grades in the leach solutions reached commercial levels, well in advance of when we expected this to occur. We also filed the Aquifer Protection Permit amendment application in June with the Arizona Department of Environmental Quality and just this week, the Underground Injection Control Permit amendment with the US EPA. In addition to the continued technical successes, financing discussions are progressing with a number of potential lenders and joint venture partners."

Mr. Hallbauer concluded, "We continue the engineering work on our recently acquired Yellowhead Copper Project. The environmental assessment process is underway and discussions are ongoing with local first nations and Provincial and Federal government regulators."

^{*}Non-GAAP performance measure. See end of news release.

Second Quarter Review

- Second quarter earnings from mining operations before depletion and amortization* were \$18.6 million, and Adjusted EBITDA was \$14.7 million;
- Cash flow from operations was \$11.1 million, a 54% increase over the first quarter of 2019;
- Copper production in the second quarter was 34.7 million pounds and copper sales were 32.3 million pounds (100% basis), both increasing 39% over the first quarter of 2019;
- Molybdenum production was 653 thousand pounds; molybdenum prices remained steady and averaged US\$12.18 per pound during the quarter;
- Site operating costs, net of by-product credits* were US\$1.71 per pound produced, a 10% decrease from the first quarter of 2019;
- Net loss was \$11.0 million (\$0.04 per share) and adjusted net loss* was \$17.5 million (\$0.07 per share);
- Depletion and amortization was \$30.1 million in the second quarter, an increase of \$10.0 million (or \$0.04/share) from the prior quarter due to increased depreciation of capitalized strip associated with ore processed from the Granite pit;
- During the quarter, the Company entered into equipment refinancings at attractive rates on existing mine equipment at Gibraltar and received net proceeds of \$22.2 million, and made its semi-annual bond interest payment of \$14.3 million;
- In April 2019, the Company announced first copper production from the test facility at the Florence Copper project. In June 2019, the Company announced its submission of the permit amendment application for the Aquifer Protection Permit to the Arizona Department of Environmental Quality and that it achieved commercial grade leach solution; and
- The Company's cash balance at June 30, 2019 was \$42.0 million.

^{*}Non-GAAP performance measure. See end of news release.

OPERATIONS ANALYSIS

Second Quarter Operating Results

Copper production in the second quarter was 34.7 million pounds. Copper grade for the quarter averaged 0.256%, which was in line with management expectations, the mine plan, and the life of mine average grade. Copper recovery in the mill was 87.7% during the quarter. Production was also positively affected by higher mill throughput during the quarter.

A total of 26.6 million tons were mined during the period, an increase of 3.3 million tons over the previous quarter as shovel fleet availability returned to planned levels. The strip ratio for the second quarter was 2.3 to 1.

^{*}Non-GAAP performance measure. See end of news release.

OPERATIONS ANALYSIS - CONTINUED

Total site spending (including capitalized stripping costs) was 6% higher than the previous quarter. The increase was a result of higher mine operations costs from an increase in tons mined and timing of maintenance related costs. A smaller proportion of mining costs are being capitalized in the second quarter because of advancement in the Granite pit. Capitalized stripping costs totaled \$2.0 million (75% basis) compared to \$8.0 million in the prior quarter. These factors contributed to the increase in site operating cost per ton milled*, which was \$11.51 for the period.

Molybdenum production was 653 thousand pounds in the second quarter. Molybdenum prices held steady and averaged US\$12.18 per pound over the quarter. By-product credits per pound of copper produced* decreased to US\$0.21 in the second quarter from US\$0.32 in the previous quarter as a result of the increase in copper production.

Off-property costs per pound produced* were US\$0.30 for the second quarter of 2019. Off-property costs consist of concentrate treatment, refining and transportation costs, and these costs are in line with recent quarters relative to copper sold.

GIBRALTAR OUTLOOK

Gibraltar is expected to produce approximately 130 million pounds (+/-5%) on a 100% basis in 2019, comparable to the production level achieved in 2018. While there will be quarterly fluctuations in both copper and molybdenum production, the Company does not anticipate those fluctuations to be as significant for the remainder of the year. The fundamentals for copper remain strong and most industry analysts are projecting a growing deficit and higher copper prices in the coming years.

REVIEW OF PROJECTS

Taseko's strategy has been to grow the Company by leveraging cash flow from the Gibraltar Mine to assemble and develop a pipeline of projects. We continue to believe this will generate long-term returns for shareholders. Our development projects are located in British Columbia and Arizona and represent a diverse range of metals, including gold, copper, molybdenum and niobium. Our current focus is on the development of the Florence Copper Project.

Florence Copper

Wellfield operations at the Production Test Facility ("PTF") commenced in the fourth quarter of 2018. On April 12, 2019, the Company announced that the SX/EW plant was producing first copper and the first harvest from the PTF resulted in 3,700 pounds of copper cathode which was assayed at higher than 99.9% copper. In June, the Company announced that after approximately six months of operating the PTF, the leach solution reached commercial grade levels well in advance of expectations.

The main focus of the PTF phase is to demonstrate to regulators and key stakeholders that hydraulic control of underground leach solutions can be maintained, and provide valuable data to validate the Company's leach model as well as optimize well design and performance and hydraulic control parameters. Successful operation of the in-situ leaching process will allow permits to be amended for the full scale commercial operation, which is expected to produce 85 million pounds of copper cathode annually for 20 years.

REVIEW OF PROJECTS - CONTINUED

Two key permit amendments are required to commence construction of the commercial scale facility at Florence Copper. These are the Aquifer Protection Permit ("APP") amendment application to the Arizona Department of Environmental Quality ("ADEQ") and the permit amendment application for the Underground Injection Control ("UIC") Permit to the U.S. Environmental Protection Agency ("EPA"). In June 2019, the Company submitted the APP amendment application to the ADEQ. The UIC permit amendment application was submitted to the EPA in the first week of August. It is anticipated that permitting of the commercial scale operation could be completed in the first half of 2020.

The estimated capital cost of the commercial scale operation is US\$204 million based on the Company's 2017 43-101 technical report and the Company has continued to advance various project financing options from debt providers, royalty companies, and potential joint venture partners. Management is targeting to have the project finance funding committed in advance of both the APP and UIC permit amendments being issued by the ADEQ and EPA, respectively.

Total expenditures at the Florence Project in the second quarter of 2019 were \$3.5 million which includes PTF operation and other project development costs.

Yellowhead Copper

On February 15, 2019, the Company acquired all of the outstanding common shares of Yellowhead Mining Inc. ("Yellowhead") that it did not already own, in exchange for 17.3 million Taseko common shares.

Yellowhead holds a 100% interest in a copper-gold-silver development project located in south-central British Columbia. The project feasibility study dated July 31, 2014, proposed a 70,000 tonne per day concentrator with total pre-production capital costs of approximately \$1 billion and an average operating cost of US\$1.46 per pound of copper. Using US\$3.00 per pound of copper, a Canadian/US dollar exchange rate of 0.80, an 8% discount rate and other assumptions from the 2014 feasibility study results in a pre-tax net present value of \$1.1 billion.

Since the acquisition, Taseko has restarted the environmental review process for the Yellowhead Copper Project, and the Company's technical team has commenced an engineering redesign of the project to enhance economics with the objective of issuing a new 43-101 technical report by the end of 2019.

Aley Niobium

Environmental monitoring and product marketing initiatives on the project continue. A drill program was completed in 2018 to collect samples for further metallurgical testing. A pilot plant scale program commenced in the second quarter on the currently bench scale proven niobium flotation and converter processes. The pilot plant will also provide final product samples for marketing purposes. Aley project expenditures were \$0.1 million in the first half of 2019.

New Prosperity

In June 2019, the Supreme Court of Canada dismissed the Tsilhqot'in First Nation application to appeal an earlier judgment by the BC Supreme Court and by the British Columbia Court of Appeal. These court rulings confirm that the Company can proceed with the site investigation work that was authorized by the Province of British Columbia in July 2017. The approved work program is investigative in nature and will gather hydrological and other information required for the British Columbia Mines Act Permitting process.

Note: Gibraltar is a contractual, unincorporated joint venture between Taseko Mines Limited (75% interest) and Cariboo Copper Corp. (25% interest). All production and sales figures are reported on a 100% basis, unless otherwise noted.

Taseko will host a conference call on Thursday, August 8, 2019 at 11:00 a.m. Eastern Time (8:00 a.m. Pacific) to discuss these results. The conference call may be accessed by dialing (888) 390-0546 in Canada and the United States, or (416) 764-8688 internationally. Alternatively, a live and archived webcast will also be available at tasekomines.com. The conference call will be archived for later playback until August 22, 2019 and can be accessed by dialing (888) 390-0541 in Canada and the United States, or (416) 764-8677 internationally and using the passcode 190432.

For further information on Taseko, please see the Company's website at www.tasekomines.com or contact:

NON-GAAP PERFORMANCE MEASURES

This document includes certain non-GAAP performance measures that do not have a standardized meaning prescribed by IFRS. These measures may differ from those used by, and may not be comparable to such measures as reported by, other issuers. The Company believes that these measures are commonly used by certain investors, in conjunction with conventional IFRS measures, to enhance their understanding of the Company's performance. These measures have been derived from the Company's financial statements and applied on a consistent basis. The following tables below provide a reconciliation of these non-GAAP measures to the most directly comparable IFRS measure.

Total operating costs and site operating costs, net of by-product credits

Total costs of sales include all costs absorbed into inventory, as well as transportation costs and insurance recoverable. Site operating costs is calculated by removing net changes in inventory, depletion and amortization, insurance recoverable, and transportation costs from cost of sales. Site operating costs, net of by-product credits is calculated by removing by-product credits from the site operating costs. Site operating costs, net of by-product credits per pound are calculated by dividing the aggregate of the applicable costs by copper pounds produced. Total operating costs per pound is the sum of site operating costs, net of by-product credits and off-property costs divided by the copper pounds produced. By-product credits are calculated based on actual sales of molybdenum (net of treatment costs) and silver during the period divided by the total pounds of copper produced during the period. These measures are calculated on a consistent basis for the periods presented.

	Three months June 30		Six months ended June 30,

NON-GAAP PERFORMANCE MEASURES - CONTINUED

Adjusted net income (loss)

Adjusted net income (loss) remove the effect of the following transactions from net income as reported under IFRS:

- Unrealized foreign currency gains/losses; and
- Unrealized gain/loss on copper put options.

Management believes these transactions do not reflect the underlying operating performance of our core mining business and are not necessarily indicative of future operating results. Furthermore, unrealized gains/losses on derivative instruments, changes in the fair value of financial instruments, and unrealized foreign currency gains/losses are not necessarily reflective of the underlying operating results for the reporting periods presented.

(\$ in thousands, except per share amounts)	Three month	Six months ended June 30,		
	2019	2018	2019	2018
Net loss	(11,012)	(4,671)	(18,943)	(23,152)
Unrealized foreign exchange (gain) loss	(6,258)	7,729	(12,947)	16,061
Unrealized gain on copper put options	(276)	(987)	_	(2,152)
Estimated tax effect of adjustments	75	266	-	581
Adjusted net income (loss)	(17,471)	2,337	(31,890)	(8,662)
Adjusted EPS	(0.07)	0.01	(0.13)	(0.04)

Adjusted EBITDA

Adjusted EBITDA is presented as a supplemental measure of the Company's performance and ability to service debt. Adjusted EBITDA is frequently used by securities analysts, investors and other interested parties in the evaluation of companies in the industry, many of which present Adjusted EBITDA when reporting their results. Issuers of "high yield" securities also present Adjusted EBITDA because investors, analysts and rating agencies consider it useful in measuring the ability of those issuers to meet debt service obligations.

Adjusted EBITDA represents net income before interest, income taxes, and depreciation and also eliminates the impact of a number of items that are not considered indicative of ongoing operating performance. Certain items of expense are added and certain items of income are deducted from net income that are not likely to recur or are not indicative of the Company's underlying operating results for the reporting periods presented or for future operating performance and consist of:

- Unrealized foreign exchange gains/losses;
- Unrealized gain/loss on copper put options; and
- Share-based compensation.

Earnings (loss) from mining operations before depletion and amortization

Earnings (loss) from mining operations before depletion and amortization is earnings from mining operations with depletion and amortization added back. The Company discloses this measure, which has been derived from our financial statements and applied on a consistent basis, to provide assistance in understanding the results of the Company's operations and financial position and it is meant to provide further information about the financial results to investors.

CAUTION REGARDING FORWARD-LOOKING INFORMATION

This document contains "forward-looking statements" that were based on Taseko's expectations, estimates and projections as of the dates as of which those statements were made. Generally, these forward-looking statements can be identified by the use of forward-looking terminology such as "outlook", "anticipate", "project", "target", "believe", "estimate", "expect", "intend", "should" and similar expressions.

Forward-looking statements are subject to known and unknown risks, uncertainties and other factors that may cause the Company's actual results, level of activity, performance or achievements to be materially different from those expressed or implied by such forward-looking statements. These included but are not limited to:

- uncertainties and costs related to the Company's exploration and development activities, such as those associated with continuity of mineralization or determining whether mineral resources or reserves exist on a property;
- uncertainties related to the accuracy of our estimates of mineral reserves, mineral resources, production rates and timing of
 production, future production and future cash and total costs of production and milling;
- uncertainties related to feasibility studies that provide estimates of expected or anticipated costs, expenditures and economic returns from a mining project;
- uncertainties related to our ability to complete the mill upgrade on time estimated and at the scheduled cost;
- uncertainties related to the ability to obtain necessary licenses permits for development projects and project delays due to third party opposition;
- uncertainties related to unexpected judicial or regulatory proceedings;
- changes in, and the effects of, the laws, regulations and government policies affecting our exploration and development activities and mining operations, particularly laws, regulations and policies;
- changes in general economic conditions, the financial markets and in the demand and market price for copper, gold and other
 minerals and commodities, such as diesel fuel, steel, concrete, electricity and other forms of energy, mining equipment, and
 fluctuations in exchange rates, particularly with respect to the value of the U.S. dollar and Canadian dollar, and the continued
 availability of capital and financing;
- the effects of forward selling instruments to protect against fluctuations in copper prices and exchange rate movements and the
 risks of counterparty defaults, and mark to market risk;
- the risk of inadequate insurance or inability to obtain insurance to cover mining risks;
- the risk of loss of key employees; the risk of changes in accounting policies and methods we use to report our financial condition, including uncertainties associated with critical accounting assumptions and estimates;
- environmental issues and liabilities associated with mining including processing and stock piling ore; and
- labour strikes, work stoppages, or other interruptions to, or difficulties in, the employment of labour in markets in which we
 operate mines, or environmental hazards, industrial accidents or other events or occurrences, including third party interference
 that interrupt the production of minerals in our mines.

For further information on Taseko, investors should review the Company's annual Form 40-F filing with the United States Securities and Exchange Commission www.sec.gov and home jurisdiction filings that are available at www.sedar.com.

Cautionary Statement on Forward-Looking Information

This discussion includes certain statements that may be deemed "forward-looking statements". All statements in this discussion, other than statements of historical facts, that address future production, reserve potential, exploration drilling, exploitation activities, and events or developments that the Company expects are forward-looking statements. Although we believe the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results or developments may differ materially from those in the forward-looking statements. Factors that could cause actual results to differ materially from those in forward-looking statements include market prices, exploitation and exploration successes, continued availability of capital and financing and general economic, market or business conditions. Investors are cautioned that any such statements are not guarantees of future performance and actual results or developments may differ materially from those projected in the forward-looking statements. All of the forward-looking statements made in this MD&A are qualified by these cautionary statements. We disclaim any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise, except to the extent required by applicable law. Further information concerning risks and uncertainties associated with these forward-looking statements and our business may be found in our most recent Form 40-F/Annual Information Form on file with the SEC and Canadian provincial securities regulatory authorities.

Management's Discussion and Analysis

This management discussion and analysis ("MD&A") is intended to help the reader understand Taseko Mines Limited ("Taseko", "we", "our" or the "Company"), our operations, financial performance, and current and future business environment. This MD&A is intended to supplement and complement the consolidated financial statements and notes thereto, prepared in accordance with IAS 34 of International Financial Reporting Standards ("IFRS") for the three and six months ended June 30, 2019 (the "Financial Statements"). You are encouraged to review the Financial Statements in conjunction with your review of this MD&A and the Company's other public fillings, which are available on the Canadian Securities Administrators' website at www.sedar.com and on the EDGAR section of the United States Securities and Exchange Commission's ("SEC") website at www.sec.gov.

This MD&A is prepared as of August 6, 2019. All dollar figures stated herein are expressed in Canadian dollars, unless otherwise specified.

Cautionary Statement on Forward-Looking Information

This discussion includes certain statements that may be deemed "forward-looking statements". All statements in this discussion, other than statements of historical facts, that address future production, reserve potential, exploration drilling, exploitation activities, and events or developments that the Company expects are forward-looking statements. Although we believe the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results or developments may differ materially from those in the forward-looking statements. Factors that could cause actual results to differ materially from those in forward-looking statements include market prices, exploitation and exploration successes, continued availability of capital and financing and general economic, market or business conditions. Investors are cautioned that any such statements are not guarantees of future performance and actual results or developments may differ materially from those projected in the forward-looking statements. All of the forward-looking statements made in this MD&A are qualified by these cautionary statements. We disclaim any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise, except to the extent required by applicable law. Further information concerning risks and uncertainties associated with these forward-looking statements and our business may be found in the Company's other public filings with the SEC and Canadian provincial securities regulatory authorities.

Management's Discussion and Analysis

OVERVIEW

Taseko Mines Limited ("Taseko" or "Company") is a mining company that seeks to create long-term shareholder value by acquiring, developing, and operating large tonnage mineral deposits which, under conservative forward metal price assumptions, are capable of supporting a mine for ten years or longer. The Company's sole operating asset is the 75% owned Gibraltar Mine, operated through the Gibraltar joint venture ("Gibraltar"), which is located in central British Columbia and is one of the largest copper mines in North America. Taseko also wholly owns the Florence Copper Project, which is advancing towards production, as well as the Aley niobium, Harmony gold, Yellowhead copper, and New Prosperity gold-copper projects.

Management's Discussion and Analysis

HIGHLIGHTS - CONTINUED

Second Quarter Review

- Second quarter earnings from mining operations before depletion and amortization* were \$18.6 million, and Adjusted EBITDA was \$14.7 million;
- Cash flow from operations was \$11.1 million, a 54% increase over the first quarter of 2019;
- Copper production in the second quarter was 34.7 million pounds and copper sales were 32.3 million pounds (100% basis), both increasing 39% over the first quarter of 2019;
- Molybdenum production was 653 thousand pounds; molybdenum prices remained steady and averaged US\$12.18 per pound during the quarter;
- Site operating costs, net of by-product credits* were US\$1.71 per pound produced, a 10% decrease from the first quarter of 2019;
- Net loss was \$11.0 million (\$0.04 per share) and adjusted net loss* was \$17.5 million (\$0.07 per share);
- Depletion and amortization was \$30.1 million in the second quarter, an increase of \$10.0 million (or \$0.04 per share) from the prior quarter due to increased depreciation of capitalized strip associated with ore processed from the Granite pit;
- During the quarter, the Company entered into equipment refinancings on existing mine equipment at Gibraltar and received net proceeds of \$22.2 million, and made its semi-annual bond interest payment of \$14.3 million;
- In April 2019, the Company announced first copper production from the test facility at the Florence Copper project. In June 2019, the Company announced its submission of the permit amendment application for the Aquifer Protection Permit to the Arizona Department of Environmental Quality and that it achieved commercial grade leach solution; and
- The Company's cash balance at June 30, 2019 was \$42.0 million.

Management's Discussion and Analysis

OPERATIONS ANALYSIS

Second Quarter Operating Results

Copper production in the second quarter was 34.7 million pounds. Copper grade for the quarter averaged 0.256%, which was in line with management expectations, the mine plan, and the life of mine average grade. Copper recovery in the mill was 87.7% during the quarter. Production was also positively affected by higher mill throughput during the quarter.

A total of 26.6 million tons were mined during the period, an increase of 3.3 million tons over the previous quarter as shovel fleet availability returned to planned levels. The strip ratio for the second quarter was 2.3 to 1.

Total site spending (including capitalized stripping costs) was 6% higher than the previous quarter. The increase was a result of higher mine operations costs from an increase in tons mined and timing of maintenance related costs. A smaller proportion of mining costs are being capitalized in the second quarter because of advancement in the Granite pit. Capitalized stripping costs totaled \$2.0 million (75% basis) compared to \$8.0 million in the prior quarter. These factors contributed to the increase in site operating cost per ton milled*, which was \$11.51 for the period.

Molybdenum production was 653 thousand pounds in the second quarter. Molybdenum prices held steady and averaged US\$12.18 per pound over the quarter. By-product credits per pound of copper produced* decreased to US\$0.21 in the second quarter from US\$0.32 in the previous quarter as a result of the increase in copper production.

Off-property costs per pound produced* were US\$0.30 for the second quarter of 2019. Off-property costs consist of concentrate treatment, refining and transportation costs, and these costs are in line with recent quarters relative to copper sold.

GIBRALTAR OUTLOOK

Gibraltar is expected to produce approximately 130 million pounds (+/-5%) on a 100% basis in 2019, comparable to the production level achieved in 2018. While there will be quarterly fluctuations in both copper and molybdenum production, the Company does not anticipate those fluctuations to be as significant for the remainder of the year. The fundamentals for copper remain strong and most industry analysts are projecting a growing deficit and higher copper prices in the coming years.

REVIEW OF PROJECTS

Taseko's strategy has been to grow the Company by leveraging cash flow from the Gibraltar Mine to assemble and develop a pipeline of projects. We continue to believe this will generate long-term returns for shareholders. Our development projects are located in British Columbia and Arizona and represent a diverse range of metals, including gold, copper, molybdenum and niobium. Our current focus is on the development of the Florence Copper Project.

*Non-GAAP performance measure. See page 20 of this MD&A

Management's Discussion and Analysis

Florence Copper

Wellfield operations at the Production Test Facility ("PTF") commenced in the fourth quarter of 2018. On April 12, 2019, the Company announced that the SX/EW plant was producing first copper and the first harvest from the PTF resulted in 3,700 pounds of copper cathode which was assayed at higher than 99.9% copper. In June, the Company announced that after approximately six months of operating the PTF, the leach solution reached commercial grade levels well in advance of expectations.

The main focus of the PTF phase is to demonstrate to regulators and key stakeholders that hydraulic control of underground leach solutions can be maintained, and provide valuable data to validate the Company's leach model as well as optimize well design and performance and hydraulic control parameters. Successful operation of the in-situ leaching process will allow permits to be amended for the full scale commercial operation, which is expected to produce 85 million pounds of copper cathode annually for 20 years.

Two key permit amendments are required to commence construction of the commercial scale facility at Florence Copper. These are the Aquifer Protection Permit ("APP") amendment application to the Arizona Department of Environmental Quality ("ADEQ") and the permit amendment application for the Underground Injection Control ("UIC") Permit to the U.S. Environmental Protection Agency ("EPA"). In June 2019, the Company submitted the APP amendment application to the ADEQ. The UIC permit amendment application was submitted to the EPA in the first week of August. It is anticipated that permitting of the commercial scale operation could be completed in the first half of 2020.

The estimated capital cost of the commercial scale operation is US\$204 million based on the Company's 2017 43-101 technical report and the Company has continued to advance various project financing options from debt providers, royalty companies, and potential joint venture partners. Management is targeting to have the project finance funding committed in advance of both the APP and UIC permit amendments being issued by the ADEQ and EPA, respectively.

Total expenditures at the Florence Project in the second quarter of 2019 were \$3.5 million which includes PTF operation and other project development costs.

Yellowhead Copper

On February 15, 2019, the Company acquired all of the outstanding common shares of Yellowhead Mining Inc. ("Yellowhead") that it did not already own, in exchange for 17.3 million Taseko common shares.

Yellowhead holds a 100% interest in a copper-gold-silver development project located in south-central British Columbia. The project feasibility study dated July 31, 2014, proposed a 70,000 tonne per day concentrator with total pre-production capital costs of approximately \$1 billion and an average operating cost of US\$1.46 per pound of copper. Using US\$3.00 per pound of copper, a Canadian/US dollar exchange rate of 0.80, an 8% discount rate and other assumptions from the 2014 feasibility study results in a pre-tax net present value of \$1.1 billion.

Since the acquisition, Taseko has restarted the environmental review process for the Yellowhead Copper Project, and the Company's technical team has commenced an engineering redesign of the project to enhance economics with the objective of issuing a new 43-101 technical report by the end of 2019.

Aley Niobium

Environmental monitoring and product marketing initiatives on the project continue. A drill program was completed in 2018 to collect samples for further metallurgical testing. A pilot plant scale program commenced in the second quarter on the currently bench scale proven niobium flotation and converter processes. The pilot plant will also

Management's Discussion and Analysis

provide final product samples for marketing purposes. Aley project expenditures were \$0.1 million in the first half of 2019.

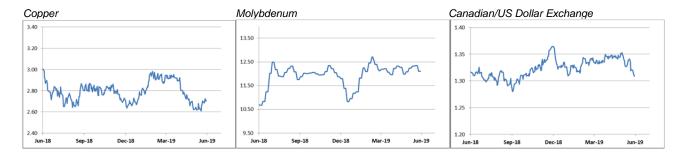

New Prosperity

In June 2019, the Supreme Court of Canada dismissed the Tsilhqot'in First Nation application to appeal an earlier judgment by the BC Supreme Court and by the British Columbia Court of Appeal. These court rulings confirm that the Company can proceed with the site investigation work that was authorized by the Province of British Columbia in July 2017. The approved work program is investigative in nature and will gather hydrological and other information required for the British Columbia Mines Act Permitting process.

ANNUAL GENERAL MEETING

The Company's Annual General Meeting was held on June 14, 2019 and shareholders voted in favour of all items of business before the meeting, including the election of all director nominees. Detailed voting results for the 2019 Annual General Meeting are available on SEDAR at www.sedar.com.

MARKET REVIEW

Prices (USD per pound for Commodities) (Source Data: Bank of Canada, Platts Metals, and London Metals Exchange)

The average price of London Metals Exchange ("LME") copper was US\$2.77 per pound in the second quarter of 2019, which was slightly lower than the first quarter of 2019 and is approximately 11% lower than the second quarter of 2018. Changes in Chinese economic demand, copper supply disruptions, global trade policies, interest rate expectations and speculative investment activity have all contributed to the recent price volatility. Despite the short-term volatility, management continues to believe that the copper market will benefit from tight mine supply going forward.

The average molybdenum price was US\$12.18 per pound in the second quarter of 2019, which was 3% higher than the first quarter of 2019. The Company's sales agreements specify molybdenum pricing based on the published Platts Metals reports.

Approximately 80% of Gibraltar's costs are Canadian dollar denominated and therefore, fluctuations in the Canadian/US dollar exchange rate can have a significant effect on the Company's operating results and unit production costs, which are reported in US dollars. The Canadian dollar weakened on average throughout the periods by 4% and 3%, respectively, for the three and six months ended June 30, 2019 compared to the same periods in 2018.

Management's Discussion and Analysis

FINANCIAL PERFORMANCE

Earnings

The Company's net loss was \$11.0 million (\$0.04 per share) for the three months ended June 30, 2019, compared to a net loss of \$4.7 million (\$0.02 per share) for the same period in 2018. The increased loss in the current period was primarily due to higher depletion and amortization expense relating to increased depreciation of capitalized stripping costs which is attributed to greater ore tons being mined from the Granite pit. This increase was partially offset by a \$6.3 million unrealized foreign exchange gain as compared to an \$7.7 million loss for the same period in 2018.

The Company's net loss was \$18.9 million (\$0.08 per share) for the six months ended June 30, 2019, compared to a net loss of \$23.2 million (\$0.10 per share) for the same period in 2018. The lower net loss in the current period was primarily due to the \$12.9 million unrealized foreign exchange gain as compared to an \$16.1 million loss for the same period in 2018, partially offset by higher production costs and depletion and amortization expense as described above.

Earnings from mining operations before depletion and amortization* was \$18.6 million and \$34.4 million, respectively for the three and six months ended June 30, 2019, compared to \$36.3 million and \$49.8 million for the same periods in 2018. The decrease in earnings from mining operations before depletion and amortization* in the current periods was a result of lower realized copper prices and higher production costs, due to less waste stripping costs being capitalized compared to the same periods in 2018.

Included in net loss are a number of items that management believes require adjustment in order to better measure the underlying performance of the business. The following items have been adjusted as management believes they are not indicative of a realized economic gain/loss or the underlying performance of the business in the period:

	Three months ended June 30,					
(Cdn\$ in thousands)	2019	2018	Change	2019	2018	Change
Net loss	(11,012)	(4,671)	(6,341)	(18,943)	(23,152)	4,209
Unrealized foreign exchange (gain) loss	(6,258)	7,729	(13,987)	(12,947)	16,061	(29,008)
Unrealized gain on copper put options	(276)	(987)	711	-	(2,152)	2,152
Estimated tax effect of adjustments	75	266	(191)	-	581	(581)
Adjusted net income (loss)*	(17,471)	2,337	(19,808)	(31,890)	(8,662)	(23,228)

^{*}Non-GAAP performance measure. See page 20 of this MD&A.

As at June 30, 2019, the Canadian dollar strengthened resulting in an unrealized foreign exchange gain of \$6.3 million and \$12.9 million, respectively, for the three and six months ended June 30, 2019. The unrealized foreign exchange gain was primarily driven by the translation of the Company's US dollar denominated senior secured notes due in 2022.

Management's Discussion and Analysis

Revenues

	Three	months e June 30,	nded	Six months ended June 30,		
(Cdn\$ in thousands)	2019	2018	Change	2019	2018	Change
Copper in concentrate	86,667	95,685	(9,018)	151,313	161,828	(10,515)
Molybdenum concentrate	8,511	4,834	3,677	17,448	9,848	7,600
Silver	1,081	1,229	(148)	2,093	2,169	(76)
Price adjustments on settlement receivables	(2,612)	(803)	(1,809)	(1,405)	(4,108)	2,703
Total gross revenue	93,647	100,945	(7,298)	169,449	169,737	(288)
Less: treatment and refining costs	(7,126)	(6,672)	(454)	(12,654)	(11,285)	(1,369)
Revenue	86,521	94,273	(7,752)	156,795	158,452	(1,657)
(thousands of pounds, unless otherwise noted)						
Copper in concentrate Average realized copper price (US\$ per	23,320	23,267	53	40,170	39,752	418
pound)	2.69	3.13	(0.44)	2.78	3.06	(0.28)
Average LME copper price (US\$ per pound)	2.77	3.12	(0.35)	2.80	3.14	(0.34)
Average exchange rate (US\$/CAD)	1.34	1.29	0.05	1.33	1.28	0.05

^{*} This amount includes a net smelter payable deduction of approximately 3.5% to derive net payable pounds of copper sold.

Copper revenues for the three and six months ended June 30, 2019 decreased by \$9.0 million and \$10.5 million, respectively, compared to the same periods in 2018, primarily due to lower realized copper prices in the current periods, partially offset by the weakening of the Canadian dollar relative to the US dollar.

During the three and six months ended June 30, 2019, negative price adjustments of \$2.6 million and \$1.7 million, respectively, were recorded for provisionally priced copper concentrate due to declining copper price trends following shipment. These adjustments resulted in a US\$0.09 and US\$0.03 per pound decrease to the average realized copper price for the three and six month period, respectively.

Molybdenum revenues for the three and six months ended June 30, 2019 increased by \$3.7 million and \$7.6 million, respectively, compared to the same periods in 2018. The increase was due to higher molybdenum sales volumes in the current periods. Molybdenum sales volumes (75% basis) were 531 and 1,108 thousand pounds, respectively, for the three and six months ended June 30, 2019, a result of higher molybdenum production and molybdenum prices above US\$12 per pound. During the six months ended June 30, 2019, price adjustment of positive \$0.3 million was recorded for provisionally priced molybdenum concentrate.

Management's Discussion and Analysis

Cost of sales						
		nonths en une 30,	ded	Six	ded	
(Cdn\$ in thousands)	2019	2018	Change	2019	2018	Change
Site operating costs	66,694,	57,671	9,023	122,124	106,548	15,576
Transportation costs	4,630	4,529	101	7,918	7,358	560
Changes in inventories of finished goods	(3,989)	813	(4,802)	(8,035)	(154)	(7,881)

Changes in inventories of ore stockpiles	540	(5,007)	5,547	413	(1,111)	1,524
Insurance recovery	-	-	-	-	(4,000)	4,000
Production costs	67,875	58,006	9,869	122,420	108,641	13,779
Depletion and amortization	30,138	17,955	12,183	50,322	32,735	17,587
Cost of sales	98,013	75,961	22,052	172,742	141,376	31,366
Site operating costs per ton milled*	\$11.51	\$10.31	\$1.20	\$11.21	\$9.49	\$1.72

^{*}Non-GAAP performance measure. See page 20 of this MD&A.

Site operating costs for the three and six months ended June 30, 2019 increased by \$9.0 million and \$15.6 million, respectively, compared to the same prior periods as less costs were capitalized in 2019 as the mine transitions from excess stripping in the Granite pit.

For the three and six months ended June 30, 2019, capitalized stripping costs were \$2.0 million and \$10.0 million, respectively, compared to \$7.7 million and \$22.3 million for the same periods in 2018. The remaining increase of \$3.3 million for the three and six months ended June 30, 2019 is due to an increase in mine maintenance expenditures.

Cost of sales is also impacted by changes in copper concentrate inventories and ore stockpiles. Inventory of copper in concentrate increased by 2.4 million pounds in the second quarter, resulting in an increase in finished goods inventories (decrease in cost of sales) of \$4.0 million. Inventory of copper concentrates increased by 3.9 million pounds in the six month period ended June 30, 2019, resulting in an increase in finished goods inventories (decrease in cost of sales) of \$8.0 million.

The stockpiled ore tonnage increased by 0.4 million tons during the second quarter of 2019. During the same period, the Company recorded an impairment of \$2.2 million to production costs to adjust the carrying value of ore stockpile inventories to net realizable value which more than offset the stockpile increase. During the six months ended June 30, 2019, stockpiled ore tonnage decreased by 0.9 million tons and the Company recorded an impairment of \$1.2 million to adjust the carrying value of ore stockpile inventories to net realizable value.

Depletion and amortization for three and six months ended June 30, 2019 increased by \$12.2 million and \$17.6 million, respectively, over the same periods in 2018. These differences are primarily due to increased depreciation of capitalized stripping costs which has increased in the current year as greater ore tons are being mined from the Granite pit and as the mining in the Granite pit transitions away from excess stripping.

For the six months ended June 30, 2018, the Company had recognized an insurance recovery of \$4.0 million (75% basis) related to the Cariboo region wildfires in 2017.

Management's Discussion and Analysis

Other operating (income) expenses

	Three months ended June 30,			Six months ended June 30,		
(Cdn\$ in thousands)	2019	2018	Change	2019	2018	Change
General and administrative	3,500	2,751	749	7,973	7,502	471
Share-based compensation expense (recovery)	399	200	199	2,113	(795)	2,908
Exploration and evaluation	566	690	(124)	1,035	1,535	(500)
Realized loss on copper put options	284	993	(709)	851	2,301	(1,450)
Unrealized gain on derivative instruments	(276)	(987)	711	-	(2,152)	2,152
Other income, net	(343)	(328)	(15)	(908)	(659)	(249)
	4,130	3,319	811	11,064	7,732	3,332

General and administrative costs have increased in three and six months ended June 30, 2019, compared to the same periods in 2018 primarily due to increases in consulting services and employee compensation.

Share-based compensation expense increased for the six months ended June 30, 2019, compared to the same period in 2018, primarily due to the revaluation of the liability for deferred share units. The lower share based compensation expense for the first half of 2018 was primarily due to the revaluation of the liability for deferred share units resulting from a decrease in the Company's share price. Share-based compensation expense is comprised of amortization of share options and performance share units and the expense on the deferred share units. More information is set out in Note 15 of the June 30, 2019 condensed consolidated interim financial statements.

Exploration and evaluation costs for the three and six months ended June 30, 2019, represent costs associated with the New Prosperity and Yellowhead projects.

During the three and six months ended June 30, 2019, the Company incurred realized losses of \$0.3 million and \$0.9 million, respectively, from copper put options that settled during the period. The unrealized gain of \$0.3 million in the second quarter of 2019 relates to the fair value adjustment of the matured copper put options.

Finance expenses

	Three months ended June 30,			Six months ended June 30,		
(Cdn\$ in thousands)	2019	2018	Change	2019	2018	Change
Interest expense	8,559	7,889	670	16,812	15,699	1,113
Finance expense – deferred revenue	1,038	1,241	(203)	2,077	2,142	(65)
Accretion of PER	451	603	(152)	901	1,203	(302)
	10,048	9,733	315	19,790	19,044	746

Interest expense increased for the three months ended June 30, 2019, primarily due to \$0.3 million in amortization of deferred financing charges and the foreign exchange impact on US dollar denominated interest payments, \$0.2 million on the new equipment loan, and \$0.2 million of interest related to lease liabilities now recognized under IFRS 16.

Interest expense increased for the six months ended June 30, 2019, primarily due to the \$0.6 million foreign exchange impact on US dollar denominated interest payments and \$0.4 million on equipment related debt.

Management's Discussion and Analysis

Finance expense - deferred revenue represents the implicit financing component of the upfront deposit from the silver streaming arrangement with Osisko Gold Royalties Ltd. ("Osisko").

Income tax

	Three months ended June 30,			Six months ended June 30,			
(Cdn\$ in thousands)	2019	2018	Change	2019	2018	Change	
Current income tax expense	298	490	(192)	408	490	(82)	
Deferred income tax expense (recovery)	(8,423)	2,092	(10,515)	(15,349)	(1,986)	(13,363)	
	(8,125)	2,582	(10,707)	(14,941)	(1,496)	(13,445)	
Effective tax rate	42.5%	123.6%	(81.1%)	44.1%	6.1%	38.0%	
Canadian statutory rate	27%	27%	-	27%	27%	-	
B.C. Mineral tax rate	9.6%	9.6%	-	9.6%	9.6%	-	

The income tax recovery for the three and six months ended June 30, 2019 was mainly due to an increase in deferred taxes. Deferred taxes were recognized on losses for accounting purposes and timing differences arising from lower depreciation for tax purposes at Gibraltar. Foreign exchange revaluations on the senior secured notes are not recognized for tax purposes until realized, and in the case of capital losses, when they are applied.

The current income tax expense represents an estimate of B.C. mineral taxes payable for the current period

FINANCIAL CONDITION REVIEW

Equity	336,508	347,077	(10,569)
Net debt (debt minus cash and equivalents)	325,832	309,816	16,016
Total common shares outstanding (millions)	246.2	228.4	17.8

Management's Discussion and Analysis

The Company's asset base is comprised principally of property, plant and equipment, reflecting the capital intensive nature of the mining business. Other current assets primarily include accounts receivable, inventories (concentrate inventories, ore stockpiles, and supplies), prepaid expenses, and marketable securities. Concentrate inventories, accounts receivable and cash balances fluctuate in relation to transportation and cash settlement schedules.

Net debt has increased by \$16.0 million in the first half of 2019. Total long-term debt increased by \$12.3 million for the six months ended June 30, 2019, due to a new equipment loan, a sale leaseback transaction on some equipment at Gibraltar, and the recognition of \$5.9 million of additional lease liabilities, under the new IFRS lease accounting standard as of January 1, 2019. These factors were partially offset by unrealized foreign exchange gains on the Company's US dollar denominated debt and principal payments for leases and equipment loans. The decrease in the cash balance in the first half of 2019 reflects capital expenditures at Florence and Gibraltar not funded from operating cash flows.

Deferred revenue relates to the advance payment received in March 2017 from Osisko for the sale of Taseko's share of future silver production from Gibraltar.

Other liabilities decreased by \$9.2 million mainly due to the decrease in deferred tax liabilities. Other liabilities includes the provision for environmental rehabilitation ("PER") of \$103.4 million at June 30, 2019.

As at August 6, 2019, there were 246,194,219 common shares outstanding. In addition, there were 10,899,900 stock options and 3,000,000 warrants outstanding at August 6, 2019. More information on these instruments and the terms of their exercise is set out in Note 15 of the June 30, 2019 unaudited condensed consolidated interim financial statements.

Liquidity, cash flow and capital resources

Cash flow provided by operations during the three months ended June 30, 2019 was \$11.1 million compared to \$20.3 million for the same period in 2018. Cash used for investing activities during the three months ended June 30, 2019 was \$7.0 million compared to \$24.2 million for the same period in 2018.

Investing cash flows in the second quarter includes \$3.5 million of expenditures at the Florence Project, \$2.0 million for capitalized stripping costs and \$1.5 million for other capital expenditures at Gibraltar.

Cash flow provided by operations during the six months ended June 30, 2019 was \$18.3 million compared to \$31.9 million for the same period in 2018. Cash used for investing activities during the six months ended June 30, 2019 was \$20.9 million compared to \$48.6 million for the same period in 2018.

Investing cash flows for the six months ended June 30, 2019 includes \$5.6 million of expenditures at the Florence Project, \$10.0 million for capitalized stripping costs and \$4.7 million for other capital expenditures at Gibraltar.

Cash provided by financing activities in the second quarter of \$3.9 million, includes principal payments for leases and equipment loans of \$7.1 million and interest paid of \$15.1 million. Cash used by financing activities for the six months ended June 30, 2019 of \$0.2 million, includes principal payments for leases and equipment loans of \$10.9 million and interest paid of \$15.5 million.

In May 2019, Gibraltar entered into an equipment loan with the Company's share of proceeds being \$13.9 million. The loan bears interest at an annual rate of 5.2%, is secured by existing mining equipment at Gibraltar and is repayable in monthly installments with a final maturity date of May 6, 2024. A portion of the proceeds of the loan were used to repay an existing equipment loan of \$1.4 million.

Management's Discussion and Analysis

In June 2019, Gibraltar entered into a sale leaseback transaction on some equipment, with the Company's share of proceeds being \$12.2 million. The lease has a term of 54 months. At the end of the lease, Gibraltar can either re-lease the equipment, purchase the equipment at fair market value or return the equipment. The lease contains a fixed early buy-out option exercisable at the end of 48 months. A portion of the proceeds of the financing were used to settle an equipment lease early in the amount of \$2.5 million.

Net proceeds from these second quarter equipment refinancings are available for general working capital purposes

At June 30, 2019, the Company had cash and equivalents of \$42.0 million (December 31, 2018 - \$45.7 million). The Company continues to make monthly principal repayments for leases and equipment loans, however, there are no principal payments required on the senior secured notes until the maturity date in June 2022. The next semi-annual interest payment of US\$10.9 million is due on December 15, 2019 on the senior secured notes.

Liquidity outlook

The Company has a pipeline of development stage projects, including the Florence Copper Project, and additional funding will be required to advance these projects to production. The Florence Copper Project has an estimated capital cost based on the Company's 2017 43-101 technical report of approximately US\$204 million (plus reclamation bonding) and the Company expects to fund a portion of these costs with debt financing. The senior secured notes (due in June 2022) allow for up to US\$100 million of first lien secured debt to be issued as well as up to US\$50 million of debt for equipment financing, all subject to the terms of the note indenture. To address project funding requirements for Florence or other projects, the Company may also raise capital through equity financings or asset sales, including royalties, sales of project interests, or joint ventures. The Company may also redeem or repurchase senior secured notes on the market. The Company evaluates these alternatives based on a number of factors including, the prevailing market prices of its common shares and senior secured notes, metal prices, liquidity requirements, covenant restrictions and other factors, in order to determine the optimal mix of capital resources to address capital requirements, minimize the Company's cost of capital, and maximize shareholder value.

Future changes in copper and molybdenum market prices could also impact the timing and amount of cash available for future investment in development projects, debt obligations, and other uses of capital. To partially mitigate commodity price risks, copper put options are entered into for a portion of Taseko's share of Gibraltar copper production (see section below "Hedging Strategy").

Hedging strategy

The Company's hedging strategy is to secure a minimum price for a portion of copper production using put options that are either purchased outright or funded by the sale of call options that are significantly out of the money. The amount and duration of the hedge position is based on an assessment of business-specific risk elements combined with the copper pricing outlook. Copper price and quantity exposure are reviewed at least quarterly to ensure that adequate revenue protection is in place. Hedge positions are typically extended adding incremental quarters at established put strike prices to provide the necessary price protection. The Company's hedging strategy is designed to mitigate short-term declines in copper price.

Considerations on the cost of the hedging program include an assessment of Gibraltar's estimated production costs, anticipated copper prices and the Company's capital requirements during the relevant period. In February 2019, the Company spent \$0.9 million to purchase copper put options that matured evenly between February and April of 2019. There were no commodity contracts outstanding as at the date of this MD&A.

Management's Discussion and Analysis

¹ The provision for environmental rehabilitation amounts presented in the table represents the present value of estimated costs of legal and constructive obligations required to retire an asset, including decommissioning and other site restoration activities, primarily for the Gibraltar Mine. The Company has provided total reclamation security of \$37.3 million for its 75% share of Gibraltar, in the form of reclamation deposits and restricted cash.

The Company has guaranteed 100% of certain capital lease and equipment loans entered into by Gibraltar in which it holds a 75% interest. As a result, the Company has guaranteed the joint venture partner's 25% share of this debt which amounted to \$13.9 million as at June 30, 2019.

² Capital expenditure commitments include only those items where the Company has entered into binding commitments.

³ Transportation related services commitments include ocean freight and port handling services, which are both cancellable upon certain operating circumstances.

Management's Discussion and Analysis

^{*}Non-GAAP performance measure. See page 20 of this MD&A

Financial results for the last eight quarters reflect: volatile copper and molybdenum prices and foreign exchange rates that impact realized sale prices; and variability in the quarterly sales volumes due to copper grades and timing of shipments which impacts revenue recognition.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The Company's significant accounting policies are presented in Note 2.4 of the 2018 annual consolidated financial statements and Note 2 of the June 30, 2019 unaudited condensed consolidated interim financial statements. The preparation of the financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

In the process of applying the Company's accounting policies, significant areas where judgment is required include the determination of a joint arrangement, determining the timing of transfer of control of inventory for revenue recognition, and recovery of other deferred tax assets.

Significant areas of estimation include reserve and resource estimation; asset valuations and the measurement of impairment charges or reversals; valuation of inventories; plant and equipment lives; tax provisions; provisions for environmental rehabilitation; valuation of financial instruments and derivatives; capitalized stripping costs and share-based compensation. Key estimates and assumptions made by management with respect to these areas have been disclosed in the notes to the consolidated financial statements as appropriate.

The accuracy of reserve and resource estimates is a function of the quantity and quality of available data and the assumptions made and judgment used in the engineering and geological interpretation, and may be subject to revision based on various factors. Changes in reserve and resource estimates may impact the carrying value of property, plant and equipment; the calculation of depreciation expense; the capitalization of stripping costs incurred during production; and the timing of cash flows related to the provision for environmental rehabilitation.

Management's Discussion and Analysis

Changes in forecast prices of commodities, exchange rates, production costs and recovery rates may change the economic status of reserves and resources. Forecast prices of commodities, exchange rates, production costs and recovery rates, and discount rates assumptions, either individually or collectively, may impact the carrying value of derivative financial instruments, inventories, property, plant and equipment, and intangibles, as well as the measurement of impairment charges or reversals.

Change in Accounting Policies

The Company adopted the new accounting standard IFRS 16, Leases, effective January 1, 2019 using the modified retrospective method. Accordingly, the comparative information presented for 2018 has not been restated and is accounted for under IAS 17 Lease. IFRS 16 sets out the principles for the recognition, measurement, presentation and disclosure of leases for both parties to a lease contract. More information on the transition to IFRS 16 is described in Note 3 of the June 30, 2019 unaudited condensed consolidated interim financial statements.

INTERNAL AND DISCLOSURE CONTROLS OVER FINANCIAL REPORTING

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting and disclosure controls and procedures.

The Company's internal control system over financial reporting is designed to provide reasonable assurance to management and the Board of Directors regarding the preparation and fair presentation of published financial statements. Internal control over financial reporting includes those policies and procedures that:

- (1) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the Company;
- (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with IFRS, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and
- (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

The Company's internal control system over disclosure controls and procedures is designed to provide reasonable assurance that material information relating to the Company is made known to management and disclosed to others and information required to be disclosed by the Company in its annual filings, interim filings or other reports filed or submitted by us under securities legislation is recorded, processed, summarized and reported within the time periods specified in the securities legislation.

All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined effective can provide only reasonable assurance with respect to financial reporting and disclosure.

There have been no changes in our internal controls over financial reporting and disclosure controls and procedures during the period ended June 30, 2019 that have materially affected, or are reasonably likely to materially affect, internal control over financial reporting and disclosure.

Management's Discussion and Analysis

RELATED PARTY TRANSACTIONS

Key management personnel

Key management personnel include the members of the Board of Directors and executive officers of the Company.

The Company contributes to a post-employment defined contribution pension plan on the behalf of certain key management personnel. This retirement compensation arrangement ("RCA Trust") was established to provide benefits to certain executive officers on or after retirement in recognition of their long service. Upon retirement, the participant is entitled to the distribution of the accumulated value of the contributions under the RCA Trust. Obligations for contributions to the defined contribution pension plan are recognized as compensation expense in the periods during which services are rendered by the executive officers.

Certain executive officers are entitled to termination and change in control benefits. In the event of termination without cause, other than a change in control, these executive officers are entitled to an amount ranging from 9-months' to 18-months' salary. In the event of a change in control, if a termination without cause or a resignation occurs within 12 months following the change of control, these executive officers are entitled to receive, among other things, an amount ranging from 24-months' to 32-months' salary and accrued bonus, and all stock options held by these individuals will fully vest.

Executive officers and directors also participate in the Company's share-based option program (refer to Note 15 of the unaudited condensed consolidated interim financial statements).

Compensation for key management personnel (including all members of the Board of Directors and executive officers) is as follows:

	Three months June 30		Six months ended June 30,	
(Cdn\$ in thousands)	2019	2018	2019	2018
Salaries and benefits	3,028	890	4,709	3,877
Post-employment benefits	390	373	779	746
Share-based compensation expense (recovery)	331	171	1,942	(986)
	3,749	1,434	7,430	3,637

Other related parties

(a) Termination of Service Agreement with HDSI

On December 31, 2018, the Company terminated the services agreement with Hunter Dickinson Services Inc. ("HDSI"), which was a related party as three directors of the Company are also principals of HDSI. In 2018 and prior years, HDSI invoiced the Company for their executive services (director fees) and for other services provided by HDSI under a services agreement dated July 2010.

Effective from January 1, 2019 HDSI no longer provides services to the Company, and the Company had no transactions with HDSI, except for a reimbursement of warehouse rental in the amount of \$7 and \$20 for the three and six month periods ended June 30, 2019.

For the six month period ended June 30, 2018, the Company incurred total costs of \$730 in transactions with HDSI. Of these, \$280 related to administrative, legal, exploration and tax services, \$310 related to

Management's Discussion and Analysis

reimbursements of office rent costs, and \$140 related to director fees for two Taseko directors who are also principals of HDSI.

(b) Gibraltar Joint Venture

Under the terms of the joint venture operating agreement, Gibraltar pays the Company a management fee for services rendered by the Company as operator of the Gibraltar Mine. In addition, the Company pays certain expenses on behalf of Gibraltar and invoices Gibraltar for these expenses.

For the three month period ended June 30, 2019, Management income for \$293 (Q2 2018: \$290) and reimbursable compensation expenses and third party costs of \$16 (Q2 2018: \$12) were charged to the joint venture partner. For the six month period ended June 30, 2019, Management income for \$583 (2018: \$582) and reimbursable compensation expenses and third party costs of \$39 (2018: \$46) were charged to the joint venture partner.

NON-GAAP PERFORMANCE MEASURES

This document includes certain non-GAAP performance measures that do not have a standardized meaning prescribed by IFRS. These measures may differ from those used by, and may not be comparable to such measures as reported by, other issuers. The Company believes that these measures are commonly used by certain investors, in conjunction with conventional IFRS measures, to enhance their understanding of the Company's performance. These measures have been derived from the Company's financial statements and applied on a consistent basis. The following tables below provide a reconciliation of these non-GAAP measures to the most directly comparable IFRS measure.

Total operating costs and site operating costs, net of by-product credits

Total costs of sales include all costs absorbed into inventory, as well as transportation costs and insurance recoverable. Site operating costs is calculated by removing net changes in inventory, depletion and amortization, insurance recoverable, and transportation costs from cost of sales. Site operating costs, net of by-product credits is calculated by removing by-product credits from the site operating costs. Site operating costs, net of by-product credits per pound are calculated by dividing the aggregate of the applicable costs by copper pounds produced. Total operating costs per pound is the sum of site operating costs, net of by-product credits and off-property costs divided by the copper pounds produced. By-product credits are calculated based on actual sales of molybdenum (net of treatment costs) and silver during the period divided by the total pounds of copper produced during the period. These measures are calculated on a consistent basis for the periods presented.

	Three months June 30		Six months ended June 30,

Adjusted net income (loss)

Adjusted net income (loss) remove the effect of the following transactions from net income as reported under IFRS:

- Unrealized foreign currency gains/losses; and
- Unrealized gain/loss on copper put options.

Management believes these transactions do not reflect the underlying operating performance of our core mining business and are not necessarily indicative of future operating results. Furthermore, unrealized gains/losses on derivative instruments, changes in the fair value of financial instruments, and unrealized foreign currency gains/losses are not necessarily reflective of the underlying operating results for the reporting periods presented.

	Three month June 3		Six months ended June 30,

Adjusted EPS	(0.07)	0.01	(0.13)	(0.04)

Adjusted EBITDA

Adjusted EBITDA is presented as a supplemental measure of the Company's performance and ability to service debt. Adjusted EBITDA is frequently used by securities analysts, investors and other interested parties in the evaluation of companies in the industry, many of which present Adjusted EBITDA when reporting their results.

Management's Discussion and Analysis

Issuers of "high yield" securities also present Adjusted EBITDA because investors, analysts and rating agencies consider it useful in measuring the ability of those issuers to meet debt service obligations.

Adjusted EBITDA represents net income before interest, income taxes, and depreciation and also eliminates the impact of a number of items that are not considered indicative of ongoing operating performance. Certain items of expense are added and certain items of income are deducted from net income that are not likely to recur or are not indicative of the Company's underlying operating results for the reporting periods presented or for future operating performance and consist of:

- Unrealized foreign exchange gains/losses;
- Unrealized gain/loss on copper put options; and
- Share-based compensation.

Earnings (loss) from mining operations before depletion and amortization

Earnings (loss) from mining operations before depletion and amortization is earnings from mining operations with depletion and amortization added back. The Company discloses this measure, which has been derived from our financial statements and applied on a consistent basis, to provide assistance in understanding the results of the Company's operations and financial position and it is meant to provide further information about the financial results to investors.

Notes to Condensed Consolidated Interim Financial Statements (Cdn\$ in thousands - unaudited)

1. REPORTING ENTITY

Taseko Mines Limited (the "Company" or "Taseko") is a corporation governed by the *British Columbia Business Corporations Act.* These unaudited condensed consolidated interim financial statements of the Company as at and for the three and six month periods ended June 30, 2019 comprise the Company, its subsidiaries and its 75% interest in the Gibraltar joint venture ("Gibraltar"), since its formation with Cariboo Copper Corporation ("Cariboo") on March 31, 2010. The Company is principally engaged in the production and sale of metals, as well as related activities including exploration and mine development, within the province of British Columbia, Canada and the State of Arizona, USA. Seasonality does not have a significant impact on the Company's operations.

2. SIGNIFICANT ACCOUNTING POLICIES

(a) Statement of compliance

These condensed consolidated interim financial statements have been prepared in accordance with IAS 34, *Interim Financial Reporting* and follow the same accounting policies and methods of application as the Company's most recent annual financial statements, except as disclosed in Note 3. These condensed consolidated interim financial statements do not include all of the information required for full consolidated annual financial statements and should be read in conjunction with the consolidated financial statements of the Company as at and for the year ended December 31, 2018, prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB).

These condensed consolidated interim financial statements were authorized for issue by the Company's Audit Committee on August 6, 2019.

(b) Use of judgments and estimates

In preparing these condensed consolidated interim financial statements, management has made judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.

The significant judgments made by management in applying the Company's accounting policies and the key sources of estimation uncertainty were the same as those applied to the consolidated financial statements for the year ended December 31, 2018, except for the new significant estimates, assumptions and judgments related to lessee accounting under IFRS 16 Leases, described in Note 3.

3. CHANGES IN SIGNIFICANT ACCOUNTING POLICIES

The Company has applied the following revised or new IFRS accounting standards that were issued and effective January 1, 2019:

IFRS 16, Leases

In January 2016, the IASB issued IFRS 16 Leases. IFRS 16 sets out the principles for the recognition, measurement, presentation and disclosure of leases for both parties to a contract that contains a lease arrangement. The Company adopted IFRS 16 effective January 1, 2019 using the modified retrospective method. Accordingly, the comparative information presented for 2018 has not been restated.

Notes to Condensed Consolidated Interim Financial Statements (Cdn\$ in thousands - unaudited)

IFRS 16 introduces significant accounting changes to the lessee by removing the distinction between operating and finance leases and requiring the recognition of a right-of-use asset ("ROU asset") and a lease liability at the commencement of the lease for all leases, except for short-term leases (lease terms of 12 months or less) and leases of low value assets.

In applying IFRS 16 for all leases, except as noted above, the Company (i) recognizes the ROU asset and lease liabilities in the consolidated interim balance sheet, initially measured at the present value of future lease payments; (ii) recognizes the depreciation of ROU assets and interest on lease liabilities in the consolidated interim statement of income (loss); and (iii) separates the total amount of cash paid into a principal and interest portion (included within financing activities) in the consolidated interim statement of cash flows. For short-term leases and leases of low value assets, the Company continues to recognize a lease expense on a straight-line basis.

In transitioning to IFRS 16, the Company reviewed its contracts to identify whether they are a lease or contain a lease arrangement and some contracts were identified as containing leases under IFRS 16. The cumulative effect of the changes made to the consolidated January 1, 2019 balance sheet for the adoption of IFRS 16 was an increase to property plant and equipment by \$6,254 and lease liabilities by \$5,962. The weighted average discount rate for lease liabilities initially recognized on adoption of IFRS 16 was 5.6%.

The following is a reconciliation of the operating lease commitments as at December 31, 2018 to the recognized lease liabilities as at January 1, 2019:

Operating lease commitments as at December 31, 2018	4,813
Leases with a lease term of 12 months or less and low value	(414)
Leases identified in existing service and supply contracts	2,144
Effect from discounting	(581)
Lease liabilities due to initial application of IFRS 16 as at January 1, 2019	5,962

New Accounting Policy for Leases Under IFRS 16

The Company assesses whether a contract is a lease or contains a lease, at the inception of a contract. The Company recognizes a ROU asset and a corresponding lease liability with respect to all lease arrangements in which it is the lessee, at the commencement of the lease, with the exception of short-term and low value leases, which are recognized on a straight-line basis over the lease term.

The ROU asset is initially measured based on the present value of lease payments, lease payments made at or before the commencement date, and any initial direct costs. They are subsequently measured at cost less accumulated depreciation and impairment losses. The ROU asset is depreciated over the shorter of the lease term or the useful life of the underlying asset and is subject to testing for impairment if there is an indicator of impairment.

The lease liability is initially measured at the present value of lease payments that are not paid at the commencement date, discounted by using the rate implicit in the lease. If this rate cannot be readily determined, the Company uses its incremental borrowing rate. Lease payments include fixed payments less any lease incentives, and any variable lease payments where variability depends on an index or rate. When the lease contains an extension or purchase option that the Company considers reasonably certain to be exercised, the cost of the option is included in the lease payments.

ROU assets are included in property, plant, and equipment, and the lease liability is included in debt in the consolidated interim balance sheet (Note 13b).

Cost of sales	98,013	75,961	172,742	141,376

Site operating costs include personnel costs, mine site supervisory costs, non-capitalized stripping costs, repair and maintenance costs, consumables, operating supplies and external services.

During the three and six months ended June 30, 2019, the Company recorded an impairment of \$3,421 and \$1,867, respectively, to adjust the carrying value of ore stockpile inventories to net realizable value, of which \$1,199 and \$700, respectively, is recorded in depletion and amortization.

During the six months ended June 30, 2018, the Company recognized an insurance recovery of \$4,000 (75% basis) related to the Cariboo region wildfires in 2017.

6. DERIVATIVE INSTRUMENTS

During the six months ended June 30, 2019, the Company purchased copper put option contracts for 15 million pounds of copper with maturity dates ranging from February to April 2019, at a strike price of US\$2.80 per pound, at a total cost of \$851.

Notes to Condensed Consolidated Interim Financial Statements (Cdn\$ in thousands - unaudited)

Notes to Condensed Consolidated Interim Financial Statements (Cdn\$ in thousands - unaudited)

9. OTHER FINANCIAL ASSETS

	June 30, 2019	December 31, 2018
Current:		
Marketable securities (Note 10)	781	3,581
	781	3,581
Long-term:		
Investment in subscription receipts	2,400	2,400
Reclamation deposits	32,558	31,480
Restricted cash	7,500	7,500
	42,458	41,380

Marketable securities at December 31, 2018 include an investment in Yellowhead, which was carried at a fair value of \$2,810 at December 31, 2018 (Note 10).

10. YELLOWHEAD ACQUISITION

In December 2018, the Company entered into an agreement to acquire all of the outstanding common shares of Yellowhead Mining Inc. ("Yellowhead") that it did not already own, in exchange for approximately 17.3 million Taseko common shares. The transaction was structured as a plan of arrangement pursuant to the Business Corporations Act (British Columbia) and required the approval of the Supreme Court of British Columbia and Yellowhead shareholders. The acquisition closed on February 15, 2019.

The total purchase consideration was calculated as follows:

Fair value of common shares issued (17,300,385 shares at \$0.73 per share)	12,630
Fair value of previously held investment in Yellowhead	3,365
Acquisition related costs	271
	16,266

The Company has incurred acquisition costs totaling \$271 for legal and other fees, which have been included in the purchase price consideration.

Prior to the acquisition, the Company held a 21% equity interest in Yellowhead. This investment was previously accounted for as a FVOCI financial asset and was remeasured to its fair value of \$3,365 based on the trading price of its common shares on the acquisition date, and that amount was included as part of the purchase consideration.

Yellowhead had cumulative tax pools of approximately \$57,000 comprised of non-capital losses and resource deductions at the date of acquisition. A full valuation allowance was provided against the deferred tax assets arising from these tax pools due to uncertainty over the timing of their potential utilization.

The acquisition has been accounted for as an asset acquisition and accordingly, the purchase consideration has been allocated to the assets acquired and liabilities assumed, based upon their estimated fair values at the date of acquisition. The following sets forth the allocation of the purchase price:

Notes to Condensed Consolidated Interim Financial Statements (Cdn\$ in thousands - unaudited)

Cash and cash equivalents	187
Accounts receivable and other assets	14
Reclamation deposits	85
Property, plant and equipment	16,240
Accounts payable and other liabilities	(260)
	16,266

Yellowhead is in the development stage and does not generate revenues. Yellowhead project related expenditures were \$259 for the period since acquisition and are expensed as exploration and evaluation costs.

	47,204	38,986

12. PROPERTY, PLANT & EQUIPMENT

The following schedule shows the continuity of property, plant and equipment net book value for the three and six months ended June 30, 2019:

	Three Months Ended June 30, 2019	Six Months Ended June 30, 2019
Net book value beginning of period	834,887	821,287
Additions:		
Gibraltar capital expenditures (including capitalized stripping costs)	5,846	16,901
Florence Copper development costs	3,687	6,921
Aley development costs	58	161
Other items:		
Right of use assets (Note 3)	1,256	9,446
Rehabilitation costs asset	6,345	4,617
Yellowhead acquisition (Note 10)	-	16,240
Disposals	(776)	(1,739)
Foreign exchange translation	(3,304)	(6,643)
Depletion and amortization	(31,091)	(50,283)
Net book value at June 30, 2019	816,908	816,908

Notes to Condensed Consolidated Interim Financial Statements (Cdn\$ in thousands - unaudited)

During the three and six months ended June 30, 2019, the Company capitalized stripping costs of \$2,290 and \$11,058, respectively. Additions to Gibraltar capital expenditures in the three and six month periods also includes \$277 and \$1,061 of non-cash depreciation on mining assets related to capitalized stripping, respectively.

Depreciation related to the right of use assets for the three and six months period ended June 30, 2019 was \$1,169 and \$1,931, respectively.

13. DEBT

	June 30, 2019	December 31, 2018
Current:		
Lease liabilities (b)	7,308	6,506
Secured equipment loans (c)	4,867	3,350
Lease related obligations (d)	1,778	-
· , ,	13,953	9,856
Long-term:		
Senior secured notes (a)	318,977	331,683
Lease liabilities (b)	8,677	7,604
Secured equipment loans (c)	15,793	6,338
Lease related obligations (d)	10,382	-
	353,829	345,625
Total debt	367,782	355,481

(a) Senior Secured Notes

In June 2017, the Company completed an offering of US\$250,000 aggregate principal amount of senior secured notes ("the Notes"). The Notes mature on June 15, 2022 and bear interest at an annual rate of 8.750%, payable semi-annually on June 15 and December 15.

The Notes are secured by liens on the shares of Taseko's wholly-owned subsidiary, Gibraltar Mines Ltd., and the subsidiary's rights under the joint venture agreement relating to the Gibraltar mine. The Notes are guaranteed by each of Taseko's existing and future restricted subsidiaries, other than Yellowhead. The Company is able to incur limited amounts of additional secured and unsecured debt under certain conditions as defined in the Note indenture. The Company is also subject to certain restrictions on asset sales, issuance of preferred stock, dividends and other restricted payments. However, there are no maintenance covenants with respect to the Company's financial performance.

The Company may redeem some or all of the Notes at any time on or after June 15, 2019, at redemption prices ranging from 104.375% to 100%, plus accrued and unpaid interest to the date of redemption. On a change of control, the Notes are redeemable at the option of the holder at a price of 101%.

Notes to Condensed Consolidated Interim Financial Statements (Cdn\$ in thousands - unaudited)

(b) Lease Liabilities

Lease liabilities includes the Company's outstanding lease liabilities under IFRS 16.

(c) Secured Equipment Loans

In May 2019, Gibraltar entered into an equipment loan with the Company's share of proceeds being \$13,875. The loan bears interest at an annual rate of 5.2%, is secured by existing mining equipment at the Gibraltar Mine and is repayable in monthly installments with a final maturity date of May 6, 2024. A portion of the proceeds of the loan were used to repay an existing equipment loan of \$1,362 and the remaining funds are available for general working capital purposes.

(d) Lease Related Obligations

In June 2019, Gibraltar entered into a sale leaseback transaction on some equipment, with the Company's share of proceeds being \$12,161. The lease has a term of 54 months. At the end of the lease, the Company can either re-lease the equipment, purchase the equipment at fair market value or return the equipment. The lease contains a fixed price early buy-out option exercisable at the end of 48 months. A portion of the proceeds of the financing were used to settle an equipment lease early in the amount of \$2,451 and the remaining funds are available for general working capital purposes.

(e) Debt Continuity

The following schedule shows the continuity of total debt for the first six months of 2019:

Total debt as at December 31, 2018	355,481
Lease additions on initial application of IFRS 16 (Note 3)	5,962
Lease additions	3,900
Equipment loan proceeds	13,875
Lease related obligations on sale leaseback transaction	12,161
Lease liabilities and equipment loans repayments	(10,869)
Unrealized foreign exchange gain	(13,915)
Amortization of deferred financing charges	1,187
Total debt as at June 30, 2019	367,782

14. DEFERRED REVENUE

On March 3, 2017, the Company entered into a silver stream purchase and sale agreement with Osisko Gold Royalties Ltd. ("Osisko"), whereby the Company received an upfront cash deposit payment of US\$33 million for the sale of an equivalent amount of its 75% share of Gibraltar payable silver production until 5.9 million ounces of silver have been delivered to Osisko. After that threshold has been met, 35% of an equivalent amount of Taseko's share of all future payable silver production from Gibraltar will be delivered to Osisko. The Company receives cash payments of US\$2.75 per ounce for all silver deliveries made under the agreement.

The Company recorded the initial deposit as deferred revenue and recognizes amounts in revenue as silver is delivered to Osisko. The amortization of deferred revenue is calculated on a per unit basis using the estimated total number of silver ounces expected to be delivered to Osisko over the life of the Gibraltar Mine. The current portion of deferred revenue is an estimate based on deliveries anticipated over the next twelve months.

Notes to Condensed Consolidated Interim Financial Statements (Cdn\$ in thousands - unaudited)

The following table summarizes changes in deferred revenue:

Balance at December 31, 2018	43,274
Finance expense (Note 7)	2,077
Amortization of deferred revenue	(1,953)
Balance at June 30, 2019	43,398

15. EQUITY

(a) Share Capital

	Common shares (thousands)
Common shares outstanding at January 1, 2019	228,431
Issued to acquire Yellowhead (Note 10)	17,300
Exercise of share options	463
Common shares outstanding at June 30, 2019	246,194

The Company's authorized share capital consists of an unlimited number of common shares with no par value.

(b) Share Purchase Warrants

At June 30, 2019, the Company had 3,000,000 share purchase warrants outstanding at an exercise price of \$2.74 per share and with an expiry date of April 1, 2020.

Ontions

(c) Share-Based Compensation

	(thousands)	Average price
Outstanding at January 1, 2019	10,337	1.64
Granted	4,612	0.75
Exercised	(463)	0.38
Cancelled/forfeited	(84)	1.84
Expired	(3,502)	2.11
Outstanding at June 30, 2019	10,900	1.13
Exercisable at June 30, 2019	7,327	1.17

During the six month period ended June 30, 2019, the Company granted 4,611,500 (2018 - 1,694,500) share options to directors, executives and employees, exercisable at an average exercise price of 0.75 per common share over a five year period. The total fair value of options granted was 1,891 (2018 - 2,474) based on a weighted average grant-date fair value of 0.41 (2018 - 1.46) per option.

The fair value of options was measured at the grant date using the Black-Scholes formula. Expected volatility is estimated by considering historic average share price volatility. The inputs used in the Black-Scholes formula are as follows:

Notes to Condensed Consolidated Interim Financial Statements (Cdn\$ in thousands - unaudited)

	Six months ended June 30, 2019
Expected term (years)	5
Forfeiture rate	0%
Volatility	64%
Dividend yield	0%
Risk-free interest rate	1.8%
Weighted-average fair value per option	\$0.41

The Company has other share-based compensation plans in the form of Deferred Share Units ("DSUs") and Performance Share Units ("PSUs").

The continuity of DSUs and PSUs issued and outstanding is as follows:

	DSUs	PSUs	
	(thousands)	(thousands)	
Outstanding at January 1, 2019	2,328	1,210	
Granted	682	875	
Settled	-	(410)	
Outstanding at June 30, 2019	3,010	1,675	

During the six month period ended June 30, 2019, 682,000 DSUs were issued to directors (2018 - 385,000) and 875,000 PSUs to senior executives (2018 - 400,000). The fair value of DSUs and PSUs granted was \$1,696 (2018 - \$2,982), with a weighted average fair value at the grant date of \$0.78 per unit for the DSUs (2018 - \$2.86 per unit) and \$1.33 per unit for the PSUs (2018 - \$4.70 per unit).

Share based compensation expense (recovery) is comprised as follows:

	Three months ended June 30,		Six months ended June 30,	
	2019	2018	2019	2018
Share options	462	353	1,160	1,531
Performance share units	253	159	507	316
Change in fair value of deferred share units	(271)	(281)	564	(2,455)
	444	231	2,231	(608)

Notes to Condensed Consolidated Interim Financial Statements (Cdn\$ in thousands - unaudited)

16. COMMITMENTS AND CONTINGENCIES

(a) Commitments

The Company is a party to certain contracts relating to service and supply agreements. Future minimum payments under these agreements as at June 30, 2019 are presented in the following table:

Remainder of 2019	2,089
2020	5,595
2021	5,300
2022	883
2023	-
2024 and thereafter	-
Total operating commitments	13,867

As at June 30, 2019, the Company had outstanding capital commitments of \$404 (At December 31, 2018: \$298).

(b) Contingencies

The Company has guaranteed 100% of certain capital lease and equipment loans entered into by Gibraltar, in which it holds a 75% interest. As a result, the Company has effectively guaranteed Cariboo's 25% share of this debt which amounted to \$13,872 as at June 30, 2019.

17. SUPPLEMENTARY CASH FLOW INFORMATION

	Three months ended June 30,		Six months ended June 30,	
	2019	2018	2019	2018
Change in non-cash working capital items				
Accounts receivable	2,064	(3,840)	8,904	2,519
Inventories	(2,577)	(4,848)	(8,218)	(3,342)
Prepaids	(1,476)	(1,586)	(1,171)	(1,005)
Accounts payable and accrued liabilities	(89)	375	(3,874)	(500)
Interest payable	(51)	(142)	(37)	24
Income tax payable	(887)	(817)	(887)	(1,167)
	(3,016)	(10,858)	(5,283)	(3,471)

18. RELATED PARTY TRANSACTIONS

(a) Termination of Service Agreement with HDSI

On December 31, 2018, the Company terminated the services agreement with Hunter Dickinson Services Inc. ("HDSI"), which was a related party as three directors of the Company are also principals of HDSI. In 2018 and prior years, HDSI invoiced the Company for their executive services (director fees) and for other services provided by HDSI under a services agreement dated July 2010.

Notes to Condensed Consolidated Interim Financial Statements (Cdn\$ in thousands - unaudited)

Effective from January 1, 2019 HDSI no longer provides services to the Company, and the Company had no transactions with HDSI, except for a reimbursement of warehouse rental costs in the amount of \$7 and \$20 for the three and six month period ended June 30, 2019.

For the three month period ended June 30, 2018, the Company incurred total costs of \$378 in transactions with HDSI. Of these, \$153 related to administrative, legal, exploration and tax services, \$155 related to reimbursements of office rent costs, and \$70 related to director fees for two Taseko directors who are also principals of HDSI.

For the six month period ended June 30, 2018, the Company incurred total costs of \$730 in transactions with HDSI. Of these, \$280 related to administrative, legal, exploration and tax services, \$310 related to reimbursements of office rent costs, and \$140 related to director fees for two Taseko directors who are also principals of HDSI.

(b) Gibraltar Joint Venture

Under the terms of the joint venture operating agreement, Gibraltar pays the Company a management fee for services rendered by the Company as operator of the Gibraltar Mine. In addition, the Company pays certain expenses on behalf of Gibraltar and invoices Gibraltar for these expenses.

For the three month period ended June 30, 2019, management income for \$293 (Q2 2018: \$290) and reimbursable compensation expenses and third party costs of \$16 (Q2 2018: \$12) were charged to Cariboo.

For the six month period ended June 30, 2019, management income for \$583 (2018: \$582) and reimbursable compensation expenses and third party costs of \$39 (2018: \$46) were charged to Cariboo.

19. FAIR VALUE MEASUREMENTS

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value hierarchy establishes three levels to classify the inputs to valuation techniques used to measure fair value, by reference to the reliability of the inputs used to estimate the fair values.

Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 – inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and

Level 3 – inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The fair values of the senior secured notes is \$320,101 and the carrying value is \$318,977 at June 30, 2019. The fair value of all other financial assets and liabilities approximates their carrying value.

The Company has certain financial assets and liabilities that are measured at fair value on a recurring basis and uses the fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value, with Level 1 inputs having the highest priority.

Notes to Condensed Consolidated Interim Financial Statements (Cdn\$ in thousands - unaudited)

	Level 1	Level 2	Level 3	Total
June 30, 2019				
Financial assets designated as FVOCI				
Marketable securities	781	-	-	781
Investment in subscription receipts	-	-	2,400	2,400
Reclamation deposits	32,558	-	-	32,558
	33,339	-	2,400	35,739
December 31, 2018				
Financial assets designated as FVOCI				
Marketable securities	3,581	-	-	3,581
Investment in subscription receipts	-	-	2,400	2,400
Reclamation deposits	31,480	-	-	31,480
	35,061	-	2,400	37,461

There have been no transfers between fair value levels during the reporting period. The carrying value of cash and equivalents, accounts receivable, accounts payable and accrued liabilities approximate their fair value as at June 30, 2019.

The fair value of the senior secured notes, a Level 1 instrument, is determined based upon publicly available information. The fair value of the lease liabilities and secured equipment loans, Level 2 instruments, are determined through discounting future cash flows at an interest rate of 5.46% based on the relevant loans effective interest rate.

The fair values of the Level 2 instruments are based on broker quotes. Similar contracts are traded in an active market and the broker quotes reflect the actual transactions in similar instruments.

The Company's metal concentrate sales contracts are subject to provisional pricing with the selling price adjusted at the end of the quotational period. At each reporting date, the Company's settlement receivable on these contracts are marked-to-market based on a quoted forward price for which there exists an active commodity market.

The subscription receipts, a Level 3 instrument, are valued based on a management estimate. As the subscription receipts are an investment in a private exploration and development company, there are no observable market data inputs. At June 30, 2019 the determination of the estimated fair value of the investment includes comparison to the market capitalization of comparable public companies.

Commodity Price Risk

The Company is exposed to the risk of fluctuations in prevailing market commodity prices on the metals it produces. The Company enters into copper put option contracts to reduce the risk of short-term copper price volatility. The amount and duration of the hedge position is based on an assessment of business-specific risk elements combined with the copper pricing outlook. Copper put option contracts are typically extended adding incremental quarters at established put strike prices to provide the necessary price protection.

Provisional pricing mechanisms embedded within the Company's sales arrangements have the character of a commodity derivative and are carried at fair value as part of accounts receivable.

Notes to Condensed Consolidated Interim Financial Statements (Cdn\$ in thousands - unaudited)

The table below summarizes the impact on revenue and receivables for changes in commodity prices on the provisionally invoiced sales volumes.

As at June 30, 2019

Copper increase/decrease by US\$0.27/lb.1

5,254

The sensitivities in the above table have been determined with foreign currency exchange rates held constant. The relationship between commodity prices and foreign currencies is complex and movements in foreign exchange can impact commodity prices. The sensitivities should therefore be used with care.

¹The analysis is based on the assumption that the period end copper price increases 10% with all other variables held constant. At June 30, 2019, 15 million pounds of copper in concentrate were exposed to copper price movements. The closing exchange rate at June 30, 2019 of CAD/USD 1.3087 was used in the analysis.
